# Technology meets Finance

The OpenFunds App project

## The OpenFunds App

OpenFunds implemented the App for its distribution funds, offering a very useful, functional and mobile tool to its team and its funds in distribution.

The success in using and the many positive and interesting feedbacks from various stakeholders has pushed OpenFunds to extend the App to all the funds interested in joining and in using an innovative and unique platform. For this purpose, features were expanded through an advanced push notification system, specific news sections to each fund and much more.

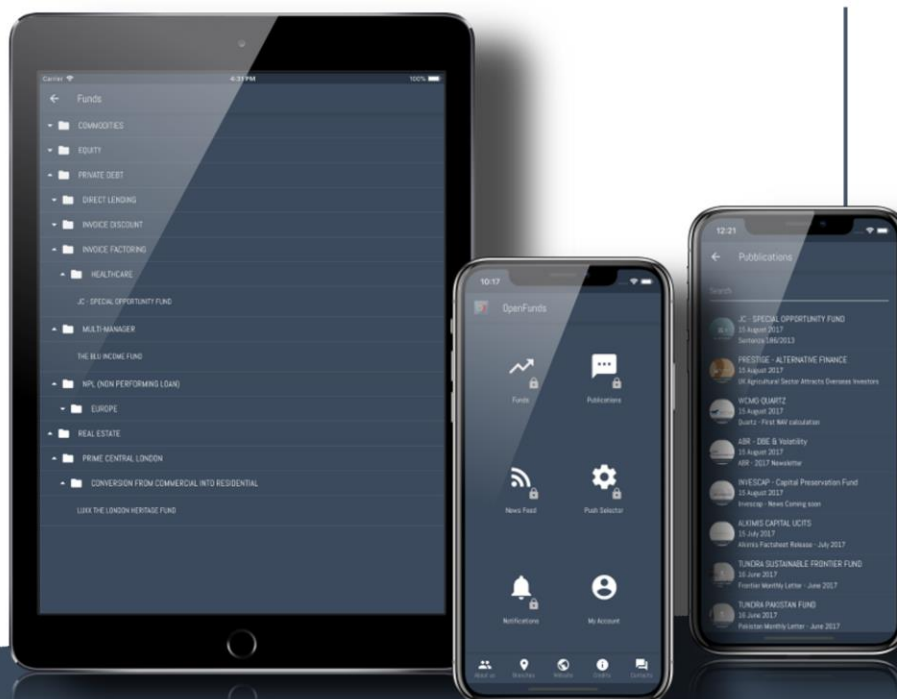

OpenFunds App evolved and is now “open” for worldwide download. It allows the user to be updated in real time on the topics of his selected interests and provide to the funds an interactive channel through a powerful mobile designed and functional platform.

The OpenFunds App is a very user-friendly tool on mobile access. You can find all the information regarding the funds such as legal documents, monthly factsheets with performance updates, publications, newsletters, events, live surveys and an overview of the fund managers’ meetings. All this ready to be downloaded, printed or shared directly with your mobile device.

The OpenFunds App is available in the Apple and Google Stores, designed for smartphone tablet, for iOS and Android Systems.
