

TUNDRA GLOBAL FRONTIER STRATEGY

JANUARY 2023

DISCLAIMER

Important: Please read this information/disclaimer

This presentation is issued by Tundra Fonder AB ("Tundra"). The information – assumptions, opinions, valuations, recommendations etc. – presented in this publication have been compiled by Tundra. The publication is based on generally available information from sources that Tundra believes to be reliable. However, Tundra cannot guarantee the accuracy of this information. This presentation – as well as all or parts of its content – may not be duplicated or distributed under any circumstances without the written permission of Tundra.

Use of information

This presentation is intended exclusively for the use of Tundra's clients in Scandinavia and is thus not intended for any individual or company in the USA, Canada, Japan or Australia, or in any other country where the publication or availability of the material is prohibited or restricted in any way. It is the responsibility of individuals or entities acquainting themselves with this presentation to inform themselves of and comply with these regulations. A legal entity may be prevented from investing in Tundra's fund by law or internal regulations. Foreign law may prevent investments to be made from outside of Sweden. Tundra will not verify that investments from outside of Sweden are made in accordance with foreign law and Tundra will not accept responsibility for any such investments. It is the responsibility of persons reading this presentation to inform themselves of, and to follow these rules. Should any such person or company nonetheless accept offers from Tundra, of whatever kind they may be, it may be disregarded. No part of this presentation should be construed as a solicitation or recommendation to conduct or make use of any type of investment or to enter into any other transactions. The opinions expressed in this presentation reflect the present views of the participants and may thus be subject to change. The information in this presentation does not take into account the specific investment goal, financial situation or needs of any specific recipient. The information should not be regarded as a personal recommendation or investment advice. The client should always seek adequate professional advice before taking any investment decision and each such investment decision is taken independently by the client and at the client's own risk. Tundra accepts no liability whatsoever for any direct or consequential loss of any kind arising from the use of this presentation.

The state of the origin of the Fund is Sweden.

Risks

Investments in financial instruments are associated with risk and an investment may both increase and decrease in value or even become worthless. Historical returns are no guarantee of future returns. International investments, particularly those on new markets in developing and growth countries (such as Eastern Europe (including Russia), Asia, Latin America and Africa), are normally associated with a higher level of risk than investments in Swedish or other developed markets' securities. These risks include both political and economic uncertainty in other countries as well as currency fluctuations. These risks are particularly high on new markets since these countries may have relatively unstable governments and immature markets and economies.

The Full Prospectus, KIID etc. are available on our homepage. You can also contact us to receive the documents free of charge. Please contact us if you require any further information: +46 8-55 11 45 70

EXECUTIVE SUMMARY

- Tundra is an independent and partner-owned frontier markets boutique, with its regulatory base in Sweden and an investment team based in Sweden, Pakistan and Vietnam
- Our gross annual return per year (USD) since inception is 7.8% vs -0.4% for our benchmark MSCI FMxGCC Net TR *
- Tundra adapts a clear thematic investment philosophy where investors will have exposure to high-growth markets in an early stage of development, which have little or no representation in a traditional Emerging Markets fund.
- Tundra has assumed a leading role in ESG integration in our markets, based on in-house analysis and ongoing dialogues with all portfolio companies and collaborations with local and international stakeholders

* Since inception until December 30th, 2022

THE WORLD IS CONSTANTLY IMPROVING

LESS PEOPLE DIE FROM CONFLICTS

Deaths in state-based conflicts, by world region

Civilian and military deaths in conflicts where the government of a state was a participant on at least one side. The data counts only direct violent deaths (i.e. excluding deaths from disease or famine).

Our World in Data

Source: OWID based on PRIO and UCDP
 Note: The figures shown aggregate the sources' 'best' estimates for deaths in individual conflicts, or the mid-point between high and low estimates where no best estimate is provided.

MORE CHILDREN GET TO GROW UP

Child mortality by income level of country, 1990 to 2020

The child mortality rate measures the share of children that die before reaching the age of 5.

Our World in Data

Source: UN Inter-agency Group for Child Mortality Estimation (via World Bank)

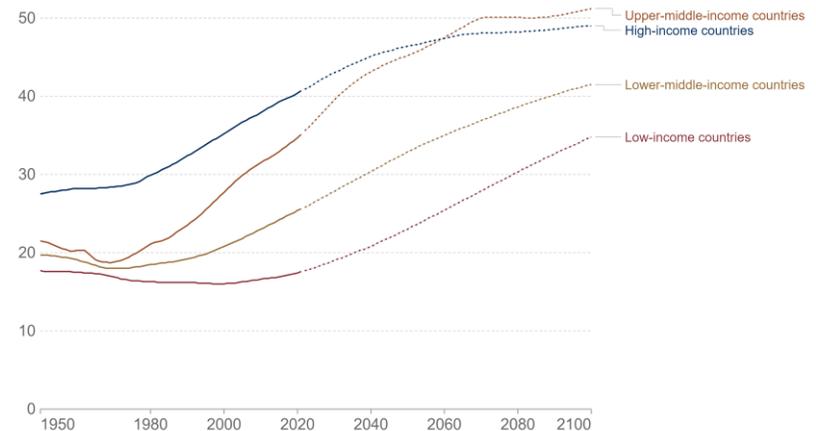

OurWorldInData.org/child-mortality/ • CC BY

WE LIVE LONGER

Median age, 1950 to 2100

The median age divides the population into two parts of equal size; that is, there are as many people with ages above the median age as there are with ages below.

Our World in Data

Source: United Nations - Population Division (2022)

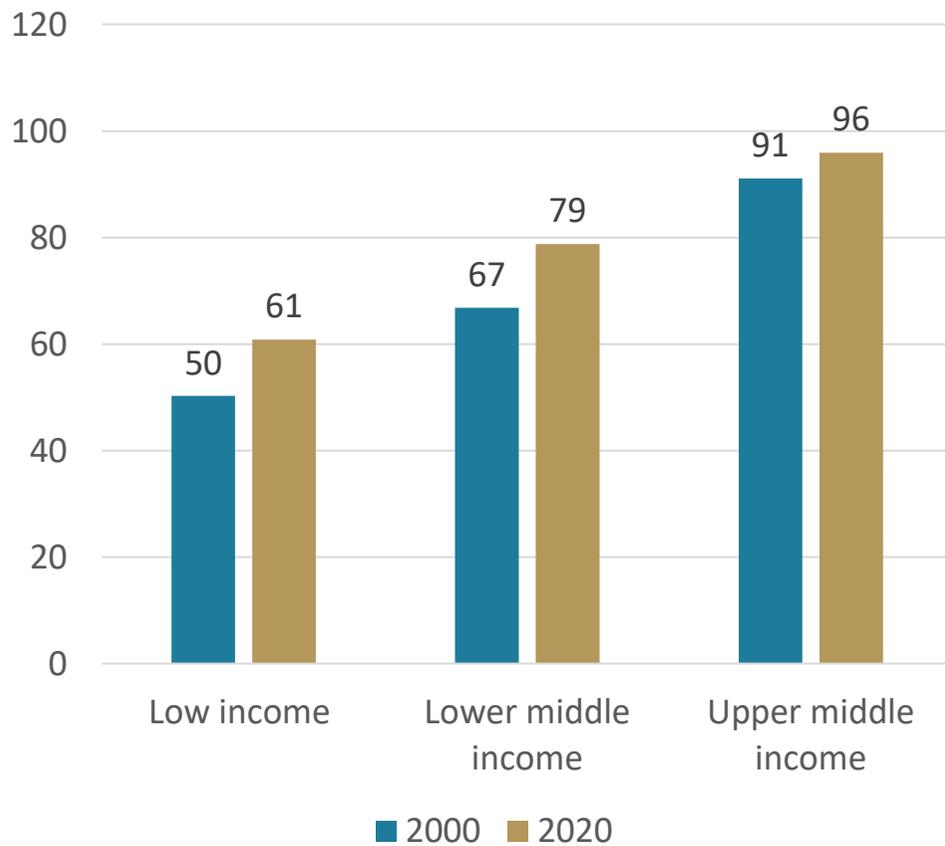

Note: 1950 to 2021 show historical estimates. From 2022 the UN projections (medium variant) are shown.

IMPROVED HUMAN CAPITAL LITERACY RATES

ALL ADULTS (>15 YEARS)

YOUTH (15-24 YRS)

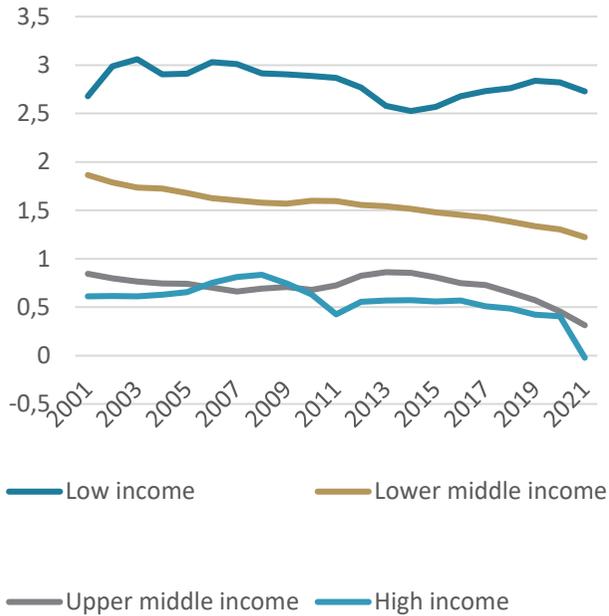

Source: World Bank

GROWTH DRIVERS

DEMOGRAPHICS

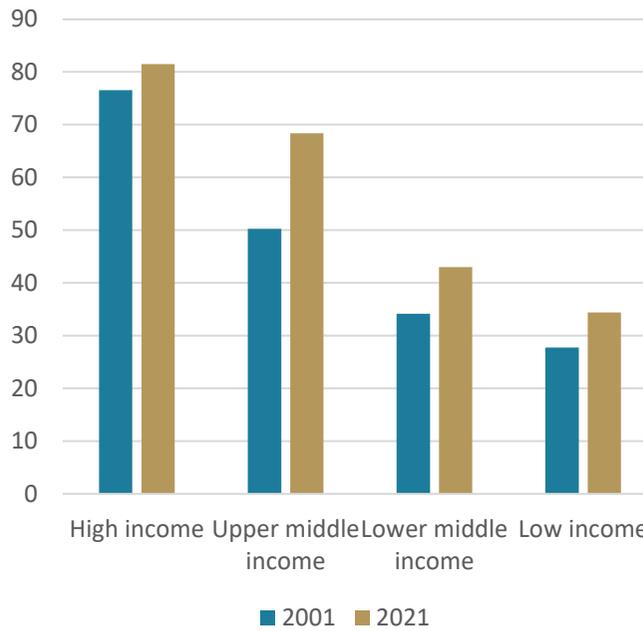

% population growth

- 52% of the world's population today, 2/3 by 2070
- Only part of the world where the workforce (15-64 yrs of age) will increase over the next 50 years
- Likely the part of the world where the economic activity will be the highest

URBANISATION

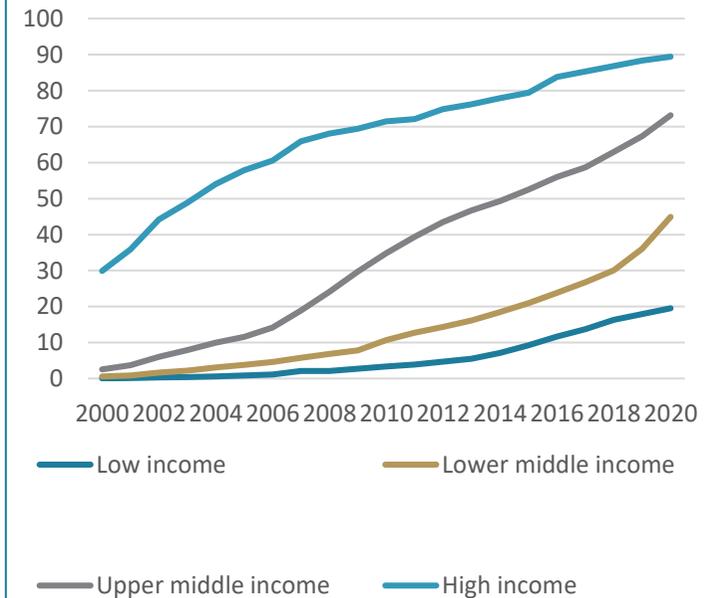

% of population living in cities

- Increased urbanization leads to increased employment and infrastructure investments (roads, schools, hospitals)
- Increased urbanization leads to increased demand for formal services and products (financial services, insurance, housing)

TECHNOLOGY

% of population with access to internet (%)

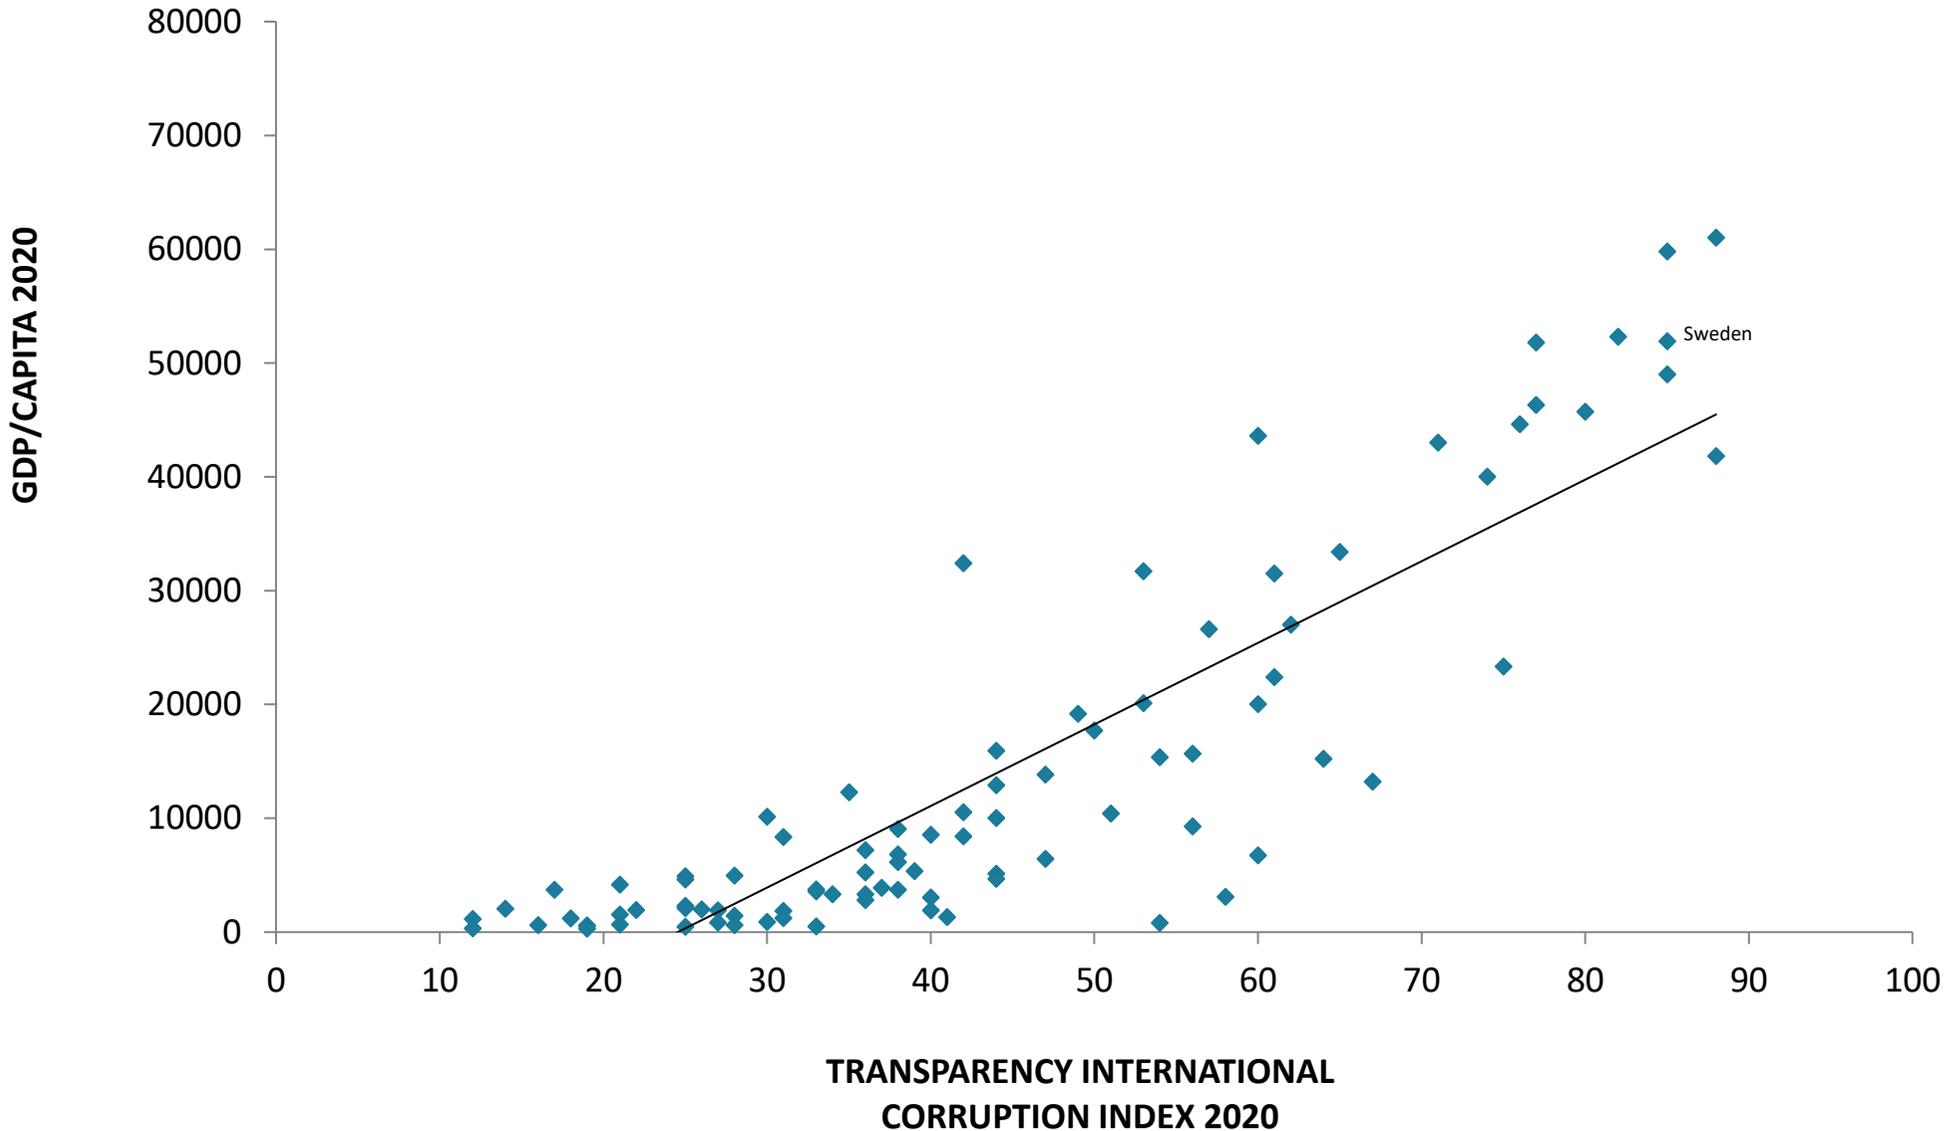

- Access to global markets simplified
- Productivity gains
- Less need for traditional infrastructure (banks)
- Service exports

POVERTY AND CORRUPTION

THE GREATEST SUSTAINABILITY CHALLENGE

WORLD'S EMISSIONS TODAY AND THE SCENARIOS

CO2 EMISSIONS PER CAPITA

CO2 EMISSIONS M TONNES SCENARIOS

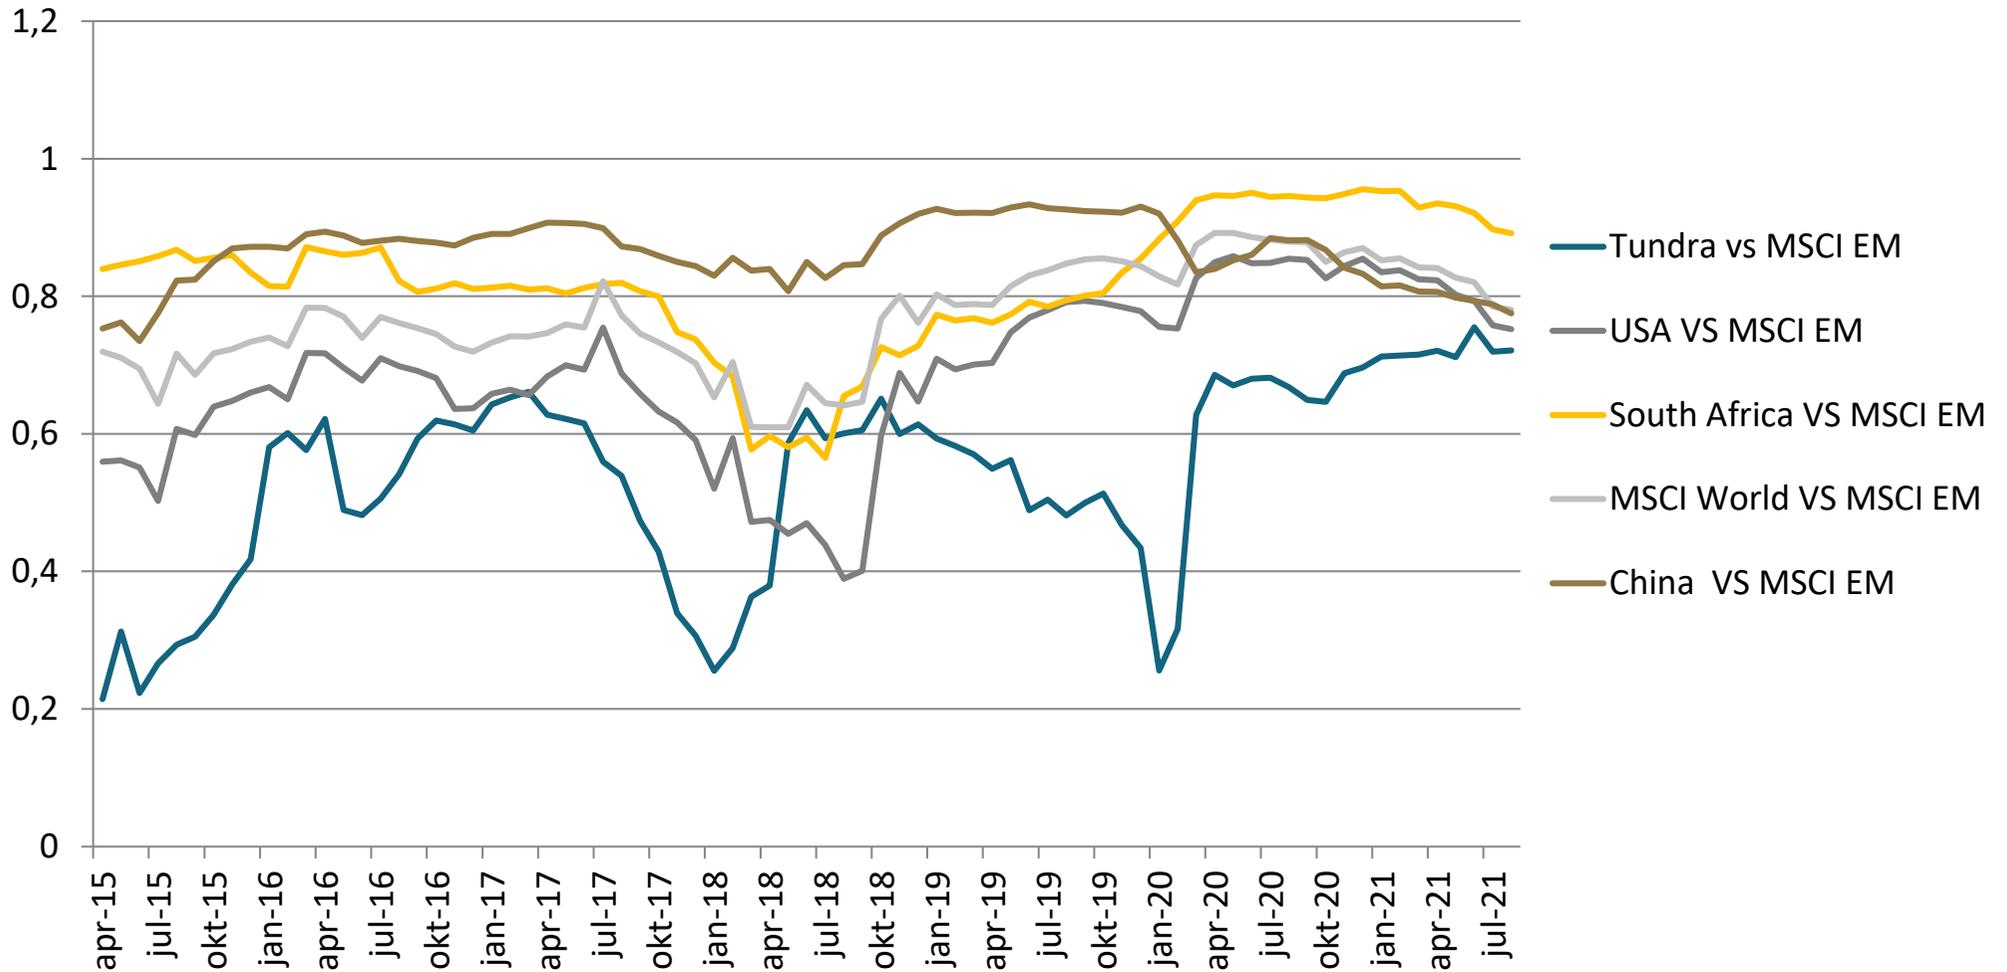

- Current average CO2 emissions per capita is 4.4 tonnes
 - If all income groups reach the level where high-income-countries are today emissions go up by 3x
 - If all income groups converge at 5 tonnes/capita emissions go up by 48%, at 3 tonnes emissions will fall by 11%
- Eradicating poverty without destroying our planet is with no doubt the world's greatest sustainability challenge for the next decades

LONG TERM ALPHA THROUGH STOCK PICKING

FUND RETURN (GROSS) VS LARGEST COUNTRY WEIGHTS (77% OF AUM) (USD)

Source: Bloomberg; Figures since inception until December 30th, 2022

WHAT CHARACTERISES A GREAT COMPANY?

- Strong sponsor and management
 - Proven ability to generate shareholder value
 - Interests aligned with minority shareholders
 - Rationale for why market share can be increased or retained
- Involved in a sector which is likely to constitute a higher share of the economy in the future
- Success of the company is good for the country
 - Lower state governance risks
 - Environmental, social and governance perspective, with equal emphasis on all three aspects

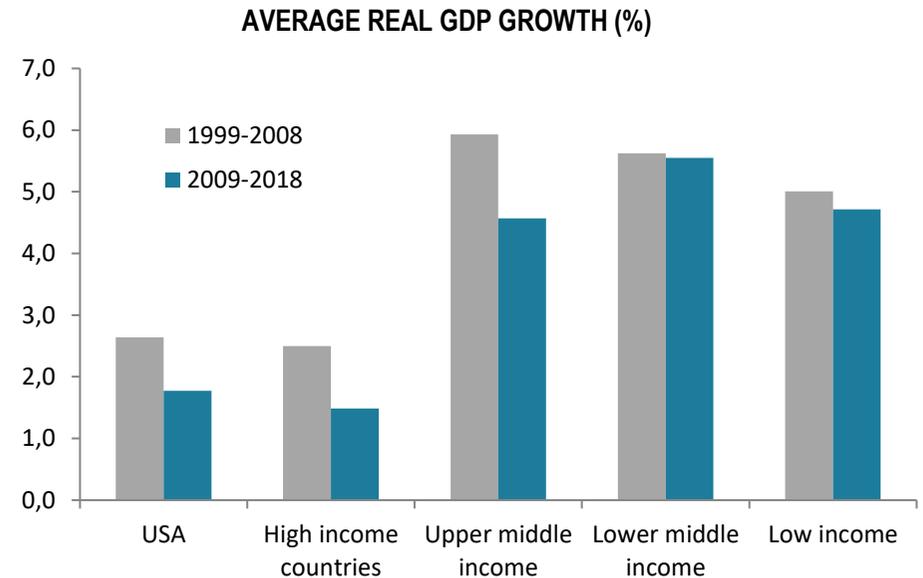

WHY OVERWEIGHT HEALTHCARE

- Median spending on healthcare in the world is USD 457/capita
- Median spending as % of GDP is 6.3%
- Pakistan is at USD 44 and 3.0% respectively
- Bangladesh is at USD 36 and 2.3% respectively
- Egypt is at USD 106 and 4.3%

➤ Dynamic growth ahead. These countries GDPs are growing faster than world GDP and, as they become more wealthy, healthcare spending as % of GDP will increase

= **Structural growth**

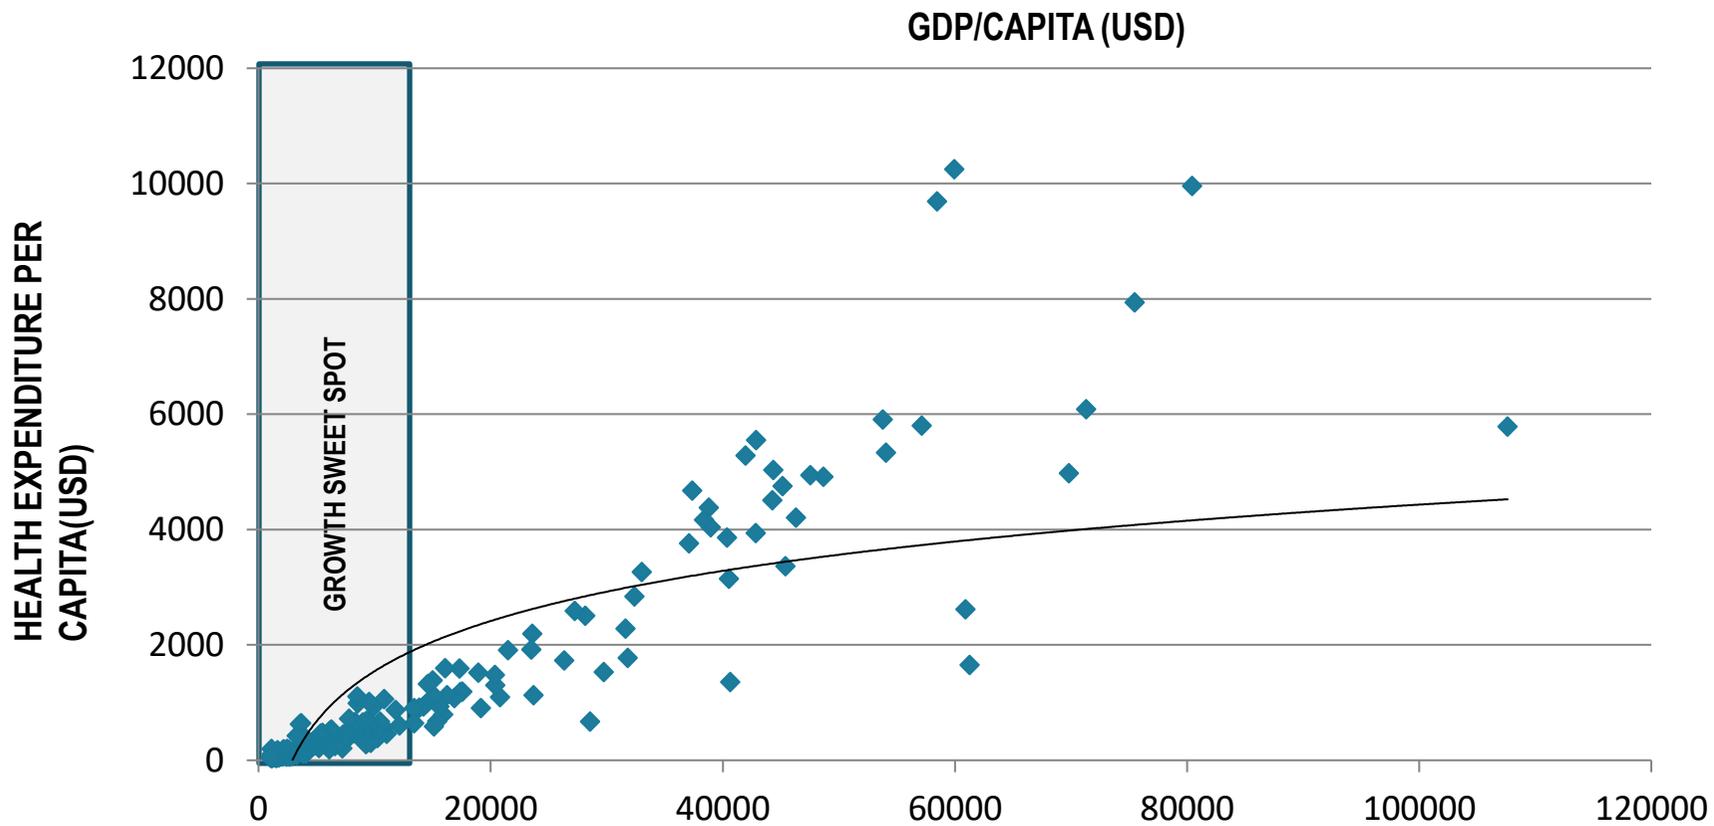

- Main risks are regulatory (price controls), brand and emerging competition

INVESTMENT RESTRICTIONS IN FRONTIER MARKETS

- On average lower corporate quality
 - Less developed equity markets
 - Largest constituents are often state-owned, and/or often in less attractive sectors (financials, energy)
 - Focus on relatively larger and more developed equity markets which improve the odds of high-quality companies being listed
 - Find younger, more energetic companies involved in sectors subject to cyclical growth
- Significantly lower liquidity
 - Amplified when avoiding the largest constituents
 - Adapt decade-long investment horizon
 - Invest in companies with a proven track record of successful adaptation to local conditions (currency volatility, political disruption, etc)
- Information deficiencies
 - Limited coverage, less developed IR functions
 - Focus on fewer markets, and do in-depth proprietary research
 - Work with concentrated portfolios as engagement, and information gathering will take time

INVESTMENT PHILOSOPHY

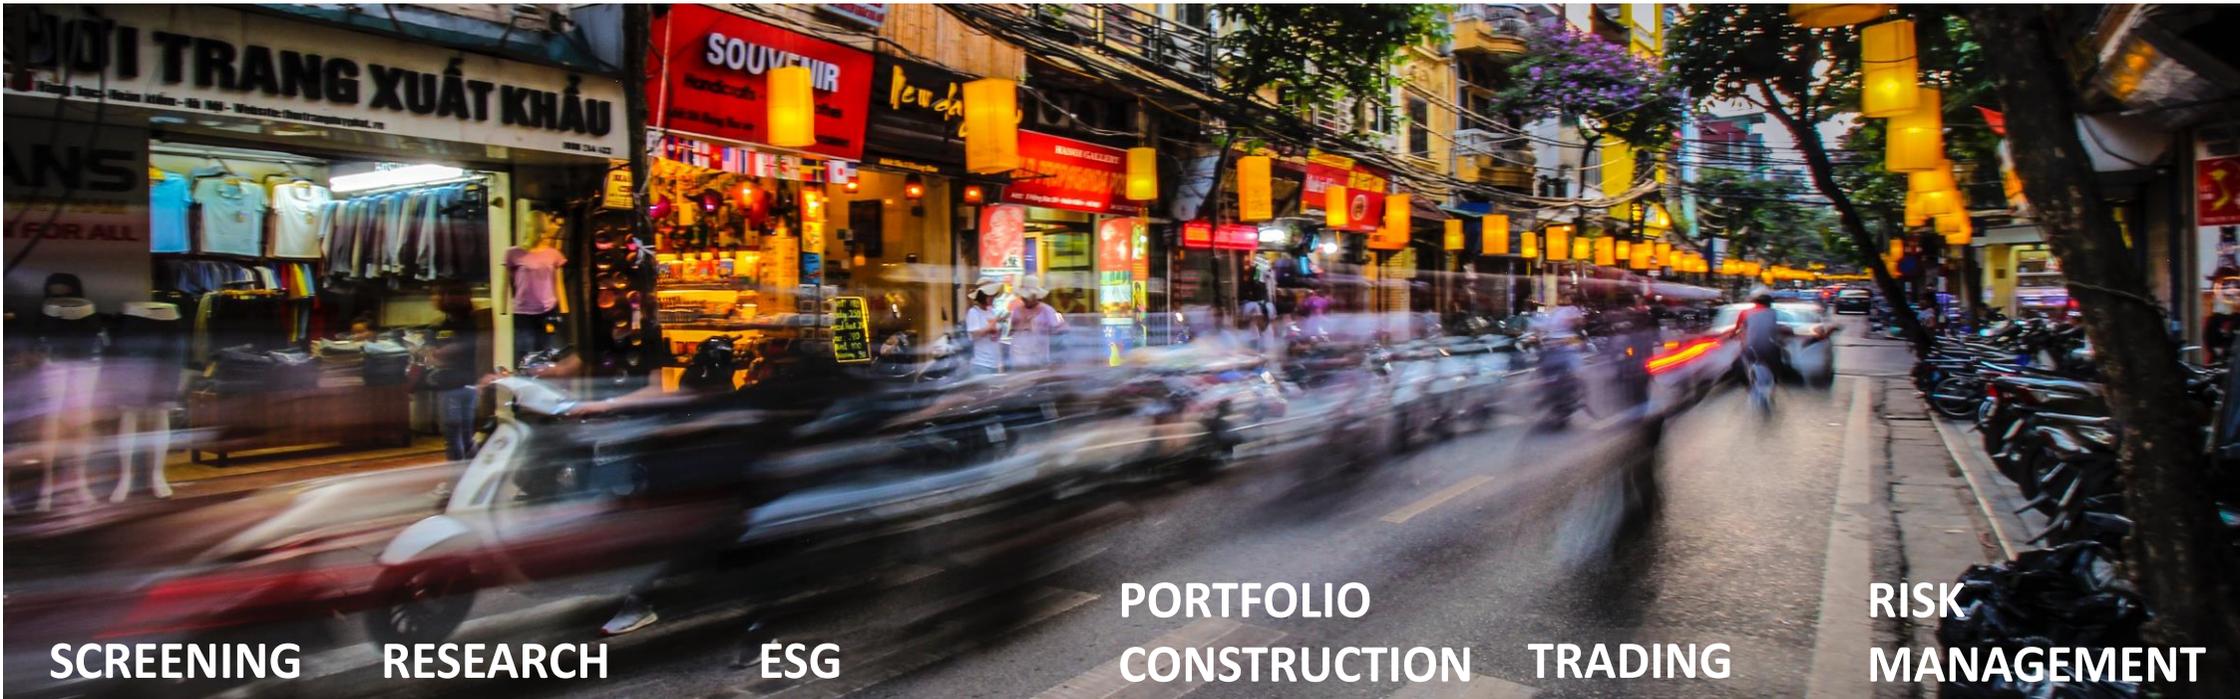

ALPHA OPPORTUNITIES

INVESTMENT PROCESS

BOTTOM UP STOCK PICKING PROCESS

SCREENING

RESEARCH

ESG

PORTFOLIO CONSTRUCTION

TRADING

RISK MANAGEMENT

- Bottom-up including stock screening
- Qualitative parameters
- Liquidity
- Valuation multiples

- 3W (Which, Why, When)
- Sizeable investment team
- Local knowledge
- Company visit
- DCF (proxy)
- Identify trigger

- Sector exclusion
- Norm breaches
- Long-term
- Responsibility
- Engagement
- Systematic
- In-house research
- Sustainability
- Collaborations

- Portfolio liquidity
- Number of stocks
- Country exposure limits
- Sector exposure limits
- Portfolio weight based on issuer conviction

- Block trading valuable skillset
- Utilize liquidity among local brokers

- Risk management by 3rd party manager to maximize independence
- MSCI Risk Metrics

PORTFOLIO CONSTRUCTION

DECISION MAKING

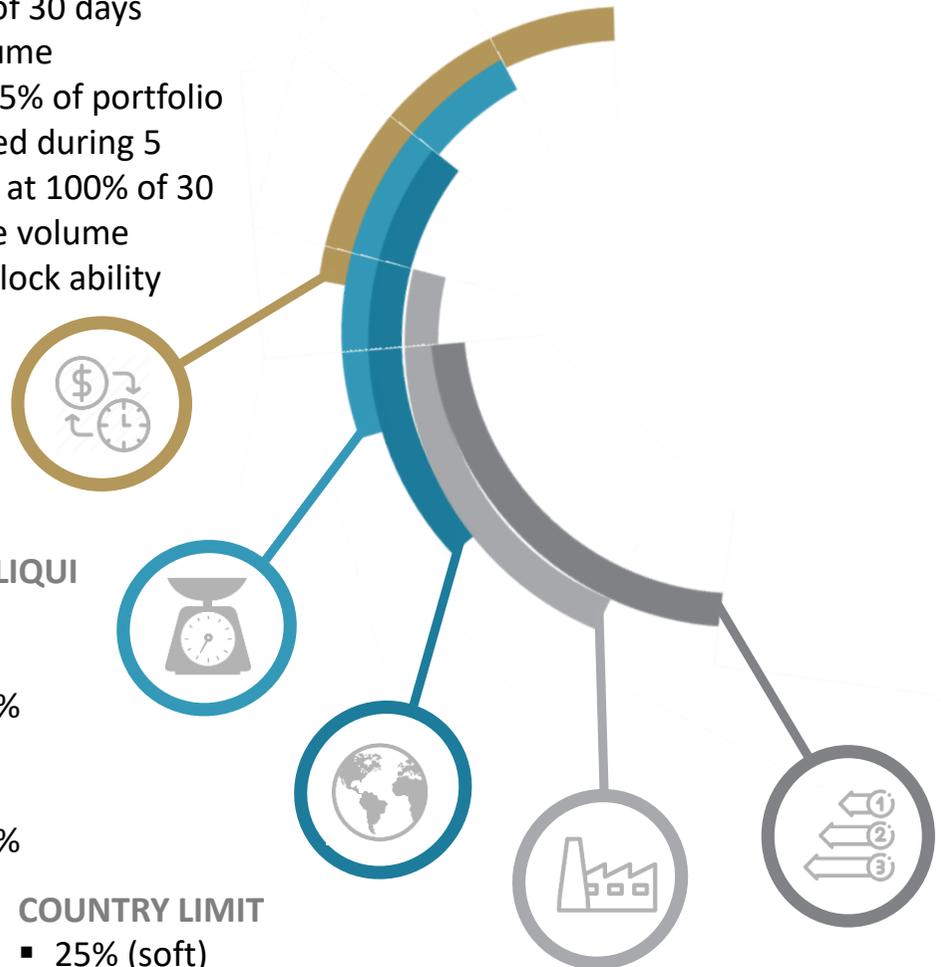

- Holdings of the portfolio are prepared by the Chief Investment Officer (CIO) and the portfolio management team.
- Each holding's size is determined in an interval (ex 2-4%) and approved by the CIO. Degree of conviction, but also liquidity, will determine the size of each position. Any changes to the band needs to be approved by the CIO.
- New holdings in the portfolio are approved by the CIO before included in the portfolio.
- Daily trading in the funds is undertaken by members of the portfolio management team.

PORTFOLIO LIQUIDITY

- Ideal 35% of portfolio to be divested during 5 trading days at 1/3 of 30 days average volume
- Minimum: 35% of portfolio to be divested during 5 trading days at 100% of 30 days average volume
- Cushion in block ability

CONVICTION/LIQUIDITY

- High & good liquidity 4-9%
- High & acceptable liquidity 1-4%

COUNTRY LIMIT

- 25% (soft)

SECTOR LIMIT

- 35% (soft)

NUMBER OF STOCKS

- 30-50

TRADING

Costs, including commissions, fees, spreads and market depth is a challenge in frontier markets

- All PMs have experience from sell side in frontier and emerging markets, two of them more than ten years
- Dominance of local investors require a carefully selected local brokerage network in order to access blocks of local institutional investors.
- Local technology platforms in most cases as advanced as in developed markets. Trading almost exclusively done through Bloomberg with tracking capability of VWAP and deviating trading patterns

RISK MANAGEMENT

- Independent 3rd party Risk Management function managed by leading Scandinavian provider (Isec Group AB)
 - Reporting directly to the Board of Directors
 - MSCI Risk Metrics*
- Reporting
 - Intra-day limit checks
 - Weekly liquidity reporting
 - Monthly reporting to the BoD
 - Ad Hoc reporting upon request
 - Liquidity risk identified as a key risk. Traffic light system applied
- Fully UCITS compliant in terms of diversification and maximum issuer exposure, etc

ATTRIBUTION

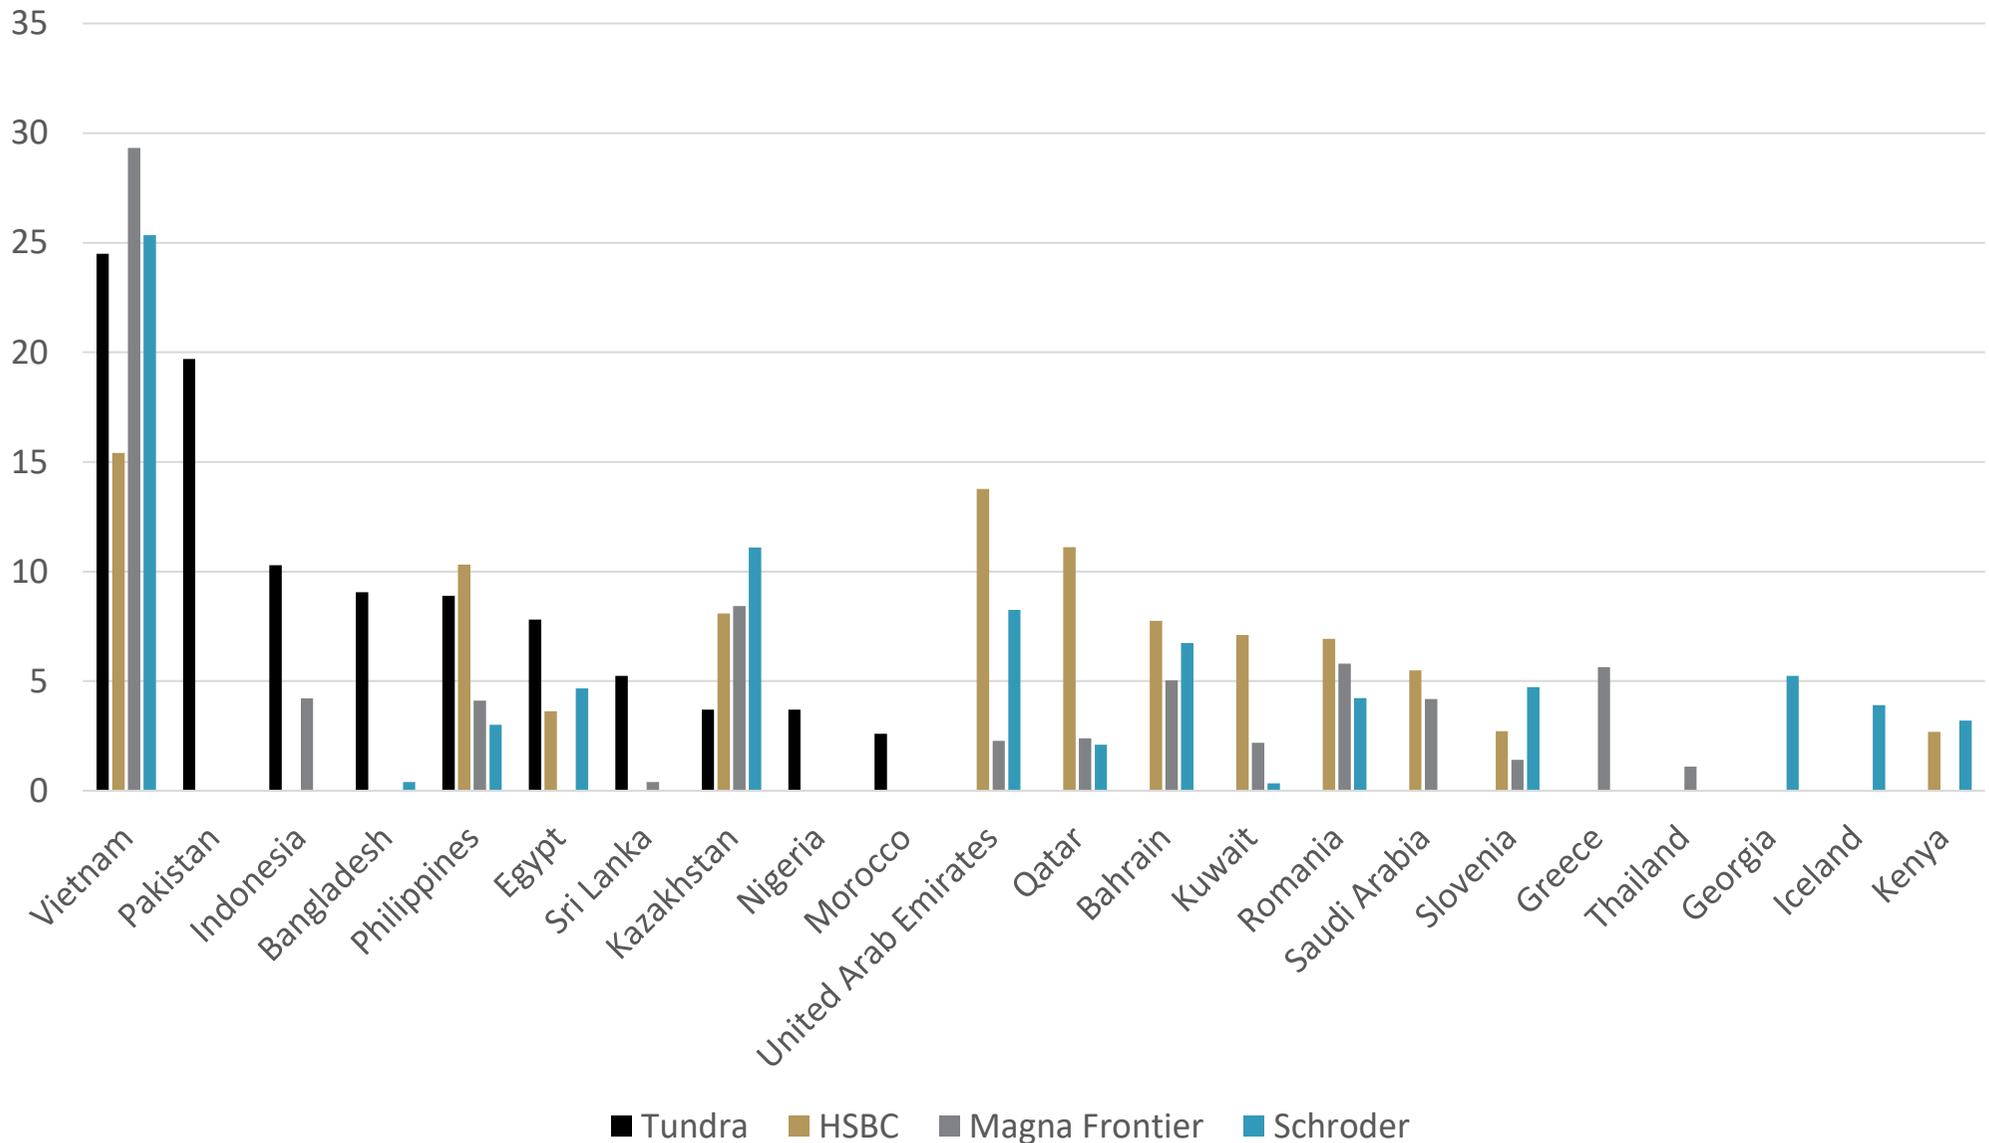

- Worst absolute year since inception
 - Ukraine Russia war's impact on commodity prices
 - "Close to decade low valuations", became "two decade low valuations"
 - Stock selection cushioned but far from enough
- Primarily good stock selection in Vietnam helped
 - No exposure to real estate developers and financials
 - Strong relative performance for top holdings (FPT (IT exports, REE (renewable energy))
- Exposure to Sri Lanka, Egypt, Pakistan and Philippines main negative contributors
 - Commodity imports
 - Devaluations
 - Political unrest

HOW DO WE DIFFER FROM TOP PEERS?

COUNTRY ALLOCATION NOVEMBER 2022 (%)

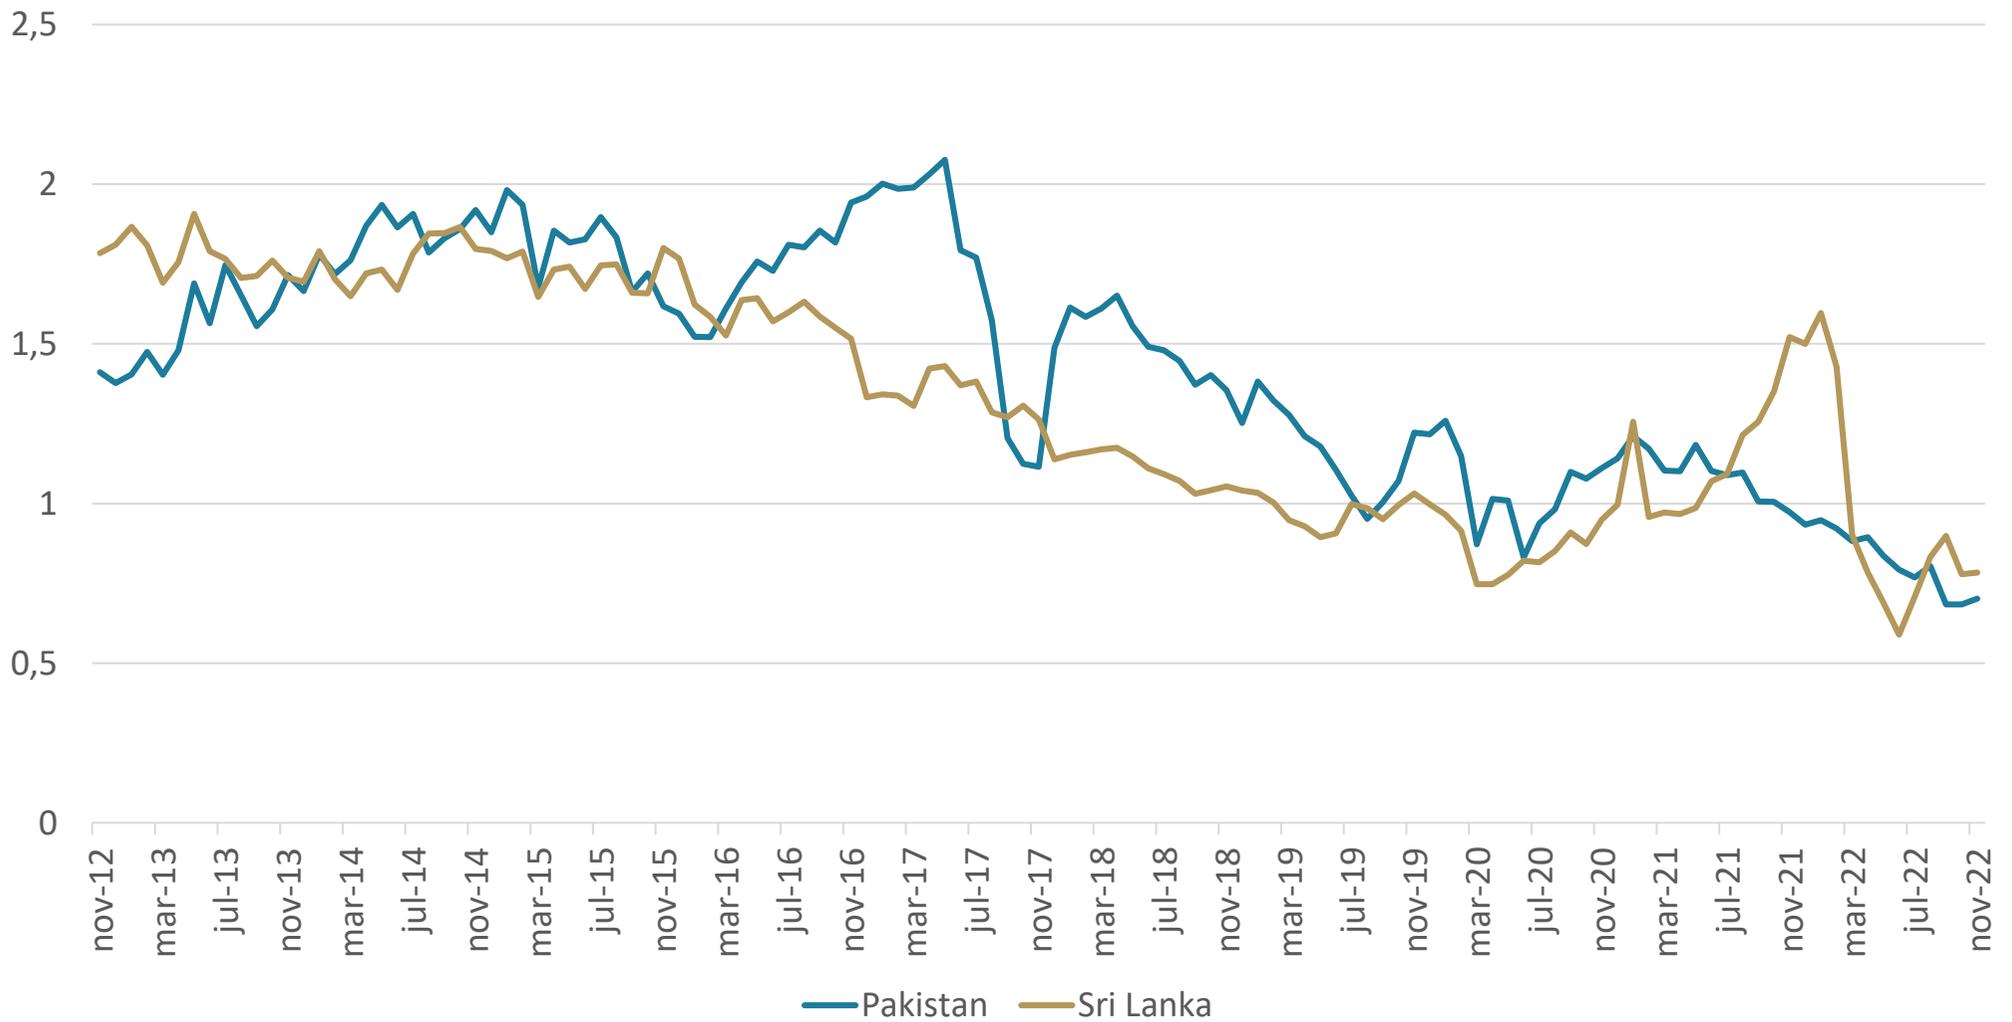

KEY RISK AND OPPORTUNITIES VS PEERS

- Likely negative correlation to commodity prices (>50% of exposure to commodity importers)
 - Pakistan, Sri Lanka, Bangladesh, Philippines, Egypt jointly constitutes 52% of NAV. High commodity prices negatively impact their current account balances and currency performances
 - Lack of GCC-markets explains underperformance vs certain frontier markets peers in 2022
 - HSBC 45% GCC-holdings, Magna 16%, Schroder 24%
 - Weaker commodity prices would positively impact key countries of exposure
- Overweight in Pakistan (18% of fund vs 1% for benchmark)
 - Political unrest until new elections likely to keep sentiment weak
 - Significant risk of debt restructuring, but low commercial debt share (5% of GDP)
 - Market at all-time-low (measurable) on P/BV means expectations are sober
 - 75% of our total exposure's earnings are positively impacted by further weakening of currency (either through exports or interest rates)
- Higher sensitivity towards individual stock-picks
 - 37 holdings (HSBC 83, Magna 53, Schroder 64)
 - Top 10 holdings 58% of fund (HSBC 39%, Magna 43%, Schroder 39%)

Average	-6%	-3%	-3%	-6%	-5%	-5%	-2%	-4%

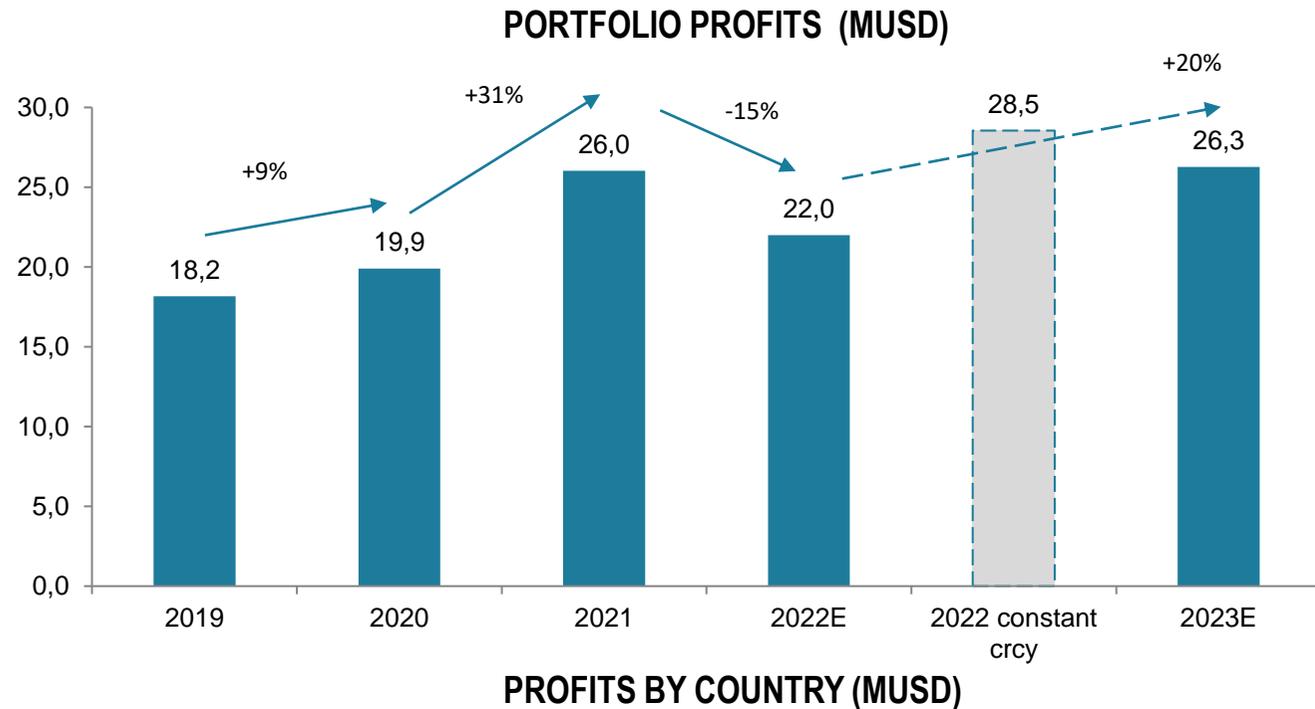

- Worst year since available data. Despite obvious risks in early 2023 statistically very unlikely to be repeated for the full year
- Over time investors should expect 4% depreciation, which is more than compensated for by higher profit growth

Source: Bloomberg, Tundra

DEVALUATIONS WILL DENT EARNINGS IN 2022

- Portfolio companies' profits expected to fall 15% in USD during 2022.
- In local currency, profits expected to rise by 10%
- Hardest hit markets Egypt and Sri Lanka, while Vietnam most insulated
- Significant macro uncertainty going into 2023, but room for 2022 scenario and still maintained USD profits

* EPS x number of shares held; For 2021 average FX-rate vs USD is used. For 2022 and 2023 USD EPS is calculated based on local FX-rate vs USD as of December 2nd 2022

All calculations assume same number of shares held throughout 2021-2023

- Top 20 holdings constituted 83% of AuM, Top 10 holdings constituted 58%
- Stand out performers: **Systems** (Pakistan), **FPT** (Vietnam), **Interloop** (Pakistan) and **Cairo Investment & Real Estate dev** (Egypt)
- **Mediakaloka Hermina** (private hospital) one-time hit due to absence of covid-19 patients.

OUTLOOK 2023

- Commodity prices
 - War in Ukraine
 - Global growth
- Debt restructurings
 - Bilateral discussions (COP 27) likely, cost vs benefits?
- Inflation and interest rate peak
- Corporate recovery
 - Normally takes two years to claw back to pre-crisis
- Foreign investors' allocation
 - Sellers since late 2014
