

GAMA FUNDS - GLOBAL HIGH YIELDING OPPORTUNITIES

Marketing communication

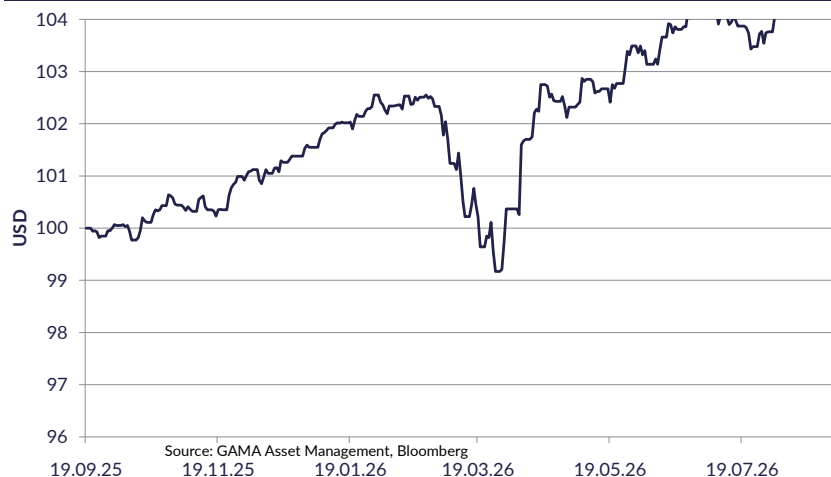

Monthly Factsheet (USD F ACC) - 31 August 2026

FUND OVERVIEW

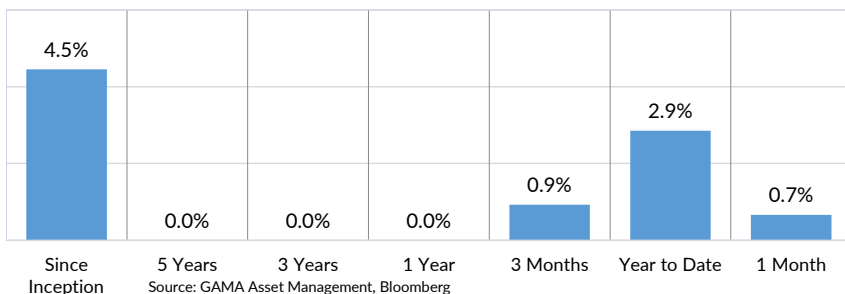

Global High Yielding Opportunities is an actively managed fixed income fund designed for investors seeking elevated returns with an investment horizon of at least three years. The fund aims to deliver attractive current income and capital appreciation while targeting a volatility below 10%. It primarily invests in a diversified portfolio of corporate bonds, including both investment grade and high yield issuers, complemented by exposure to liquid and tax-efficient credit instruments such as CDS indices.

The fund's performance is primarily driven by its exposure to credit risk, with a more limited sensitivity to interest rate movements. It may invest across all countries, sectors, currencies, and credit ratings, while maintaining a core allocation to liquid corporate investment grade bonds from developed markets. The portfolio management team follows a disciplined investment process that combines in-depth fundamental research with robust quantitative models. Relevant ESG factors are systematically integrated into the investment process.

ANNUAL PERFORMANCE (USD F ACC, NET OF FEES)

PERFORMANCE DISCLOSURES

The source for performance data is Bloomberg. Past performance may not be a reliable guide to future performance. There is no guarantee that the same returns will be obtained in the future. The value and income of any investment may fluctuate with market conditions and may lose some or all its value. Fluctuations in exchange rates between your base currency and the fund's currency, might impact the value of the investment. Performance is presented net of ongoing charges but does not take into account the taxes, commissions and costs borne by the investor when buying, holding and selling shares of the Sub-Fund.

Risk Considerations

Risk & reward: The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. There is also a risk that you could lose some or all of your invested capital.

The objective of the Sub-Fund is to provide the investors with long-term capital appreciation by mainly investing in worldwide debt securities (including convertible bonds of any type) issued by corporate or sovereign issuers. The risk/reward profile of the Sub-Fund corresponds to the low risk category of on the SRI scale.

Risks that could affect Sub-Fund performance and are not necessarily fully reflected in the risk and reward rating include:

Interest rate risk: The value of investments in bonds and other debt securities will change according to fluctuations in interest rates.

Credit risk: Most borrowers may potentially face adverse financial, economic, or political conditions that could induce or force them to default on their debt obligations. The value of investment in credit securities varies according to investors' assessment of the likelihood of such an outcome as well as in line with the general risk appetite in financial markets.

Emerging risk: Investing in so-called "emerging" countries bears greater risk due to social, economic, regulatory, and political instability, making emerging market securities more volatile and less liquid than their developed market peers.

Liquidity risk: The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

Derivatives risk: The Sub-Fund's use of financial derivatives instruments may result in material

fluctuations in its value. Certain types of derivatives transactions may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

Counterparty risk: The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

Operational risk: The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the Management Company or by third parties or may be damaged by external events, such as natural disasters.

Further information can be found in the prospectus.

ESG Considerations

The sub-fund applies binding exclusions and sector restrictions—excluding companies involved in controversial weapons, severe Global Compact violations, and those on the manager's exclusion list, as well as restricting exposure to tobacco, unconventional oil & gas, adult entertainment, gambling, and nuclear weapons. Additionally, all investments are systematically screened for ESG ratings, with a selectivity approach that limits exposure to "Laggard" companies and targets a minimum average ESG

rating within or above the third quintile; normally, no more than 10% of assets are invested in securities with the lowest ESG ratings

The sub-fund excludes companies involved in controversial weapons, severe UN Global Compact violations, and those on the manager's exclusion list, and restricts investments in companies with significant exposure to tobacco, unconventional oil & gas, adult entertainment, gambling, and nuclear weapons

The sub-fund excludes companies with the most severe UN Global Compact breaches (as defined by MSCI or similar providers) as an initial governance screen. The Investment Manager further evaluates governance using social and governance indicators—such as human rights, employee conditions, anti-corruption, and family enterprise structures—and may engage with companies to promote good governance where relevant.

Important Information

This marketing publication is distributed for information purposes only. It does not constitute a personal recommendation, independent research, or investment advice, nor is it an offer or invitation to buy or sell shares of the Fund or other securities.

The information and any opinion presented in this document have been obtained from or are based on sources believed to be reliable, but their accuracy cannot be guaranteed.

No responsibility can be accepted for any loss arising from the use of this information. The information is given as of the date of the document and directed only at those individuals who are permitted to receive such information in accordance with local regulations. In some

countries the distribution of this publication may be restricted. It is your responsibility to find out what those restrictions are and to observe them.

Sustainability-related disclosures: Further information on how the Sub-Fund's environmental and social characteristics are met, on the integration of sustainability risks and, where applicable, on the consideration of principal adverse impacts on sustainability factors is available in the prospectus and in the sustainability-related disclosures published on the Management Company's website.

Subscriptions to the Fund, an investment fund under Luxembourg law (SICAV), should in any event be made solely after seeking the advice of an independent finance, legal, accounting and tax

specialist and on the basis of the current prospectus, the Key Information Document (KID), the articles of incorporation and the most recent annual or semi-annual report. These documents can be obtained in English free of charge from the Fund's offices at 15, avenue John F. Kennedy, L-1855 Luxembourg or from the Fund's representative and paying agent in Switzerland, Banque Pictet & Cie (SA), Route des Acacias 60, CH-1211 Geneva.
